2013 FALL MEETING

Loews Ventana Canyon
Tucson, Arizona
October 12-14, 2013

2013 USCTI FALL MEETING SPONSORS

PRESIDENT'S WELCOME

My tenure as President of USCTI concludes at the close of this meeting in the gorgeous Tucson desert. Over the last two years we've gathered in Key West (FL), Alisal Ranch (CA), and Kyoto (Japan), and I cannot overstate the tremendous moments of enlightenment, motivation, camaraderie and laughter that I've enjoyed with all of you. I mention the locations because each one, including those going back years' earlier, holds a special place with unique memories for all of us.

We've got a really good thing going here. Our Program's Committee continues to schedule compelling events in unique locations. Sponsors are fighting (and paying) for access to your presence. Our cooperation with AMT specifically for sales statistics has raised our (and the industry's) profile and garnered new members. Our Institute is also spearheading a cooperative initiative to promote careers in manufacturing amongst many stakeholders. The United States Cutting Tool Institute, more than ever, is leading the future of the industry, and our meetings remain the singular focused gathering of owners and executives within the metal removal business.

As I ride off into the sunset, I encourage you to use the Institute to your advantage. Learn new methods and perspectives from our speakers and your peers. Utilize the Institute's sponsors, as they represent "best of class" within their respective categories. Desire to sell a division or your entire business? Talk to some fellow members. Let's continue to make our meetings a place where business is not only discussed, but actually happens.

To anyone who has listened, I've always stated that membership in USCTI transformed my involvement in the cutting tool industry from that of a business into one of a career (and all that entails). I thank all of you for the honor of proudly serving the Institute.

All the best,

Dave Povich
President, USCTI

PROGRAMS COMMITTEE CHAIR'S WELCOME

I want to welcome all of our USCTI friends to Tucson, Arizona and the beautiful Loews Ventana Resort. We have planned a great program that is filled with wonderful speakers and many fun events. We have golf planned for Saturday and Monday, along with a special spouses breakfast and program on Sunday morning.

We are planning a trip to the Pima Air & Space Museum on Sunday, where we will enjoy all it has to offer as well as a reception and dinner. This meeting marks the 25th Anniversary of the USCTI and we have some special plans to commemorate this milestone.

Regards,

Mike Stokey

Programs Committee Chairman, USCTI

2013 Fall Meeting
October 12-14, 2013
Loews Ventana Canyon
Tucson, Arizona

Please join us...

ARIZONA TURQUOISE AND NATIVE AMERICAN JEWELRY PRESENTATION

An informative one-hour presentation on Arizona Turquoise and Southwestern Native American Jewelry will be given by two authorities in the field - Janet Taylor and Mark Bahti.

Mark Bahti runs Tom Bahti Indian Arts, a store that his father started in 1952, and has written a number of books such as, *A Consumer's Guide to Southwest Indian Art*, *Navajo Sandpainting Art*, *Collecting Southwest Native American Jewelry*, *Southwest Indian Weaving*, *Southwest Indian Designs*, *Spirit in the Stone*, and *Stone and Silver*.

Janet Taylor is a local jewelry designer and author who concentrates on beading and creating silver charms. Her modern jewelry is often featured at art shows. Janet also wrote *The Healthy Southwest Table* which was published in 2007.

Jewelry from Janet Taylor and the Tom Bahti Indian Arts Gallery will be available for guests to purchase at the close of the event.

Complete Solutions for cutting tools

Powerful brands coming together to bring you solutions designed to meet today's tough processing challenges.

From fluting end mills to resharpening saw blades, 3M has the tools you need to achieve stringent geometry tolerances and finish specs, part after part. Together with the former Winterthur Technologies Group, which is now part of 3M and one of the world's top manufacturers of bonded abrasives for industrial use, we provide a comprehensive offering of abrasive solutions for Round Cutting Tools, Indexable Inserts, and Saw and Cutter Applications.

In search of new technology for machining ultra-hard materials, Rollomatic has added a laser cutting machine to its portfolio of conventional grinding techniques. The new super-fine laser cutting and ablation machine for the manufacturing of PCD and CVD cutting tools "LaserSmart 500" will be presented in a European premiere during the EMO in Hannover. Rollomatic will also debut upgraded 5- and 6-axis tool and peel grinders with advanced software and options that will keep you ahead of your competition.
