

UNITED STATES CUTTING TOOL INSTITUTE
LEADING THE FUTURE OF THE CUTTING TOOL INDUSTRY

2022 USCTI MEMBER PROFILE

www.uscti.com

PRESIDENT'S MESSAGE

*Jeff Major
President*

At mid-year 2022, the world continues to recover from the COVID pandemic. Fortunately, our industry has seen a nice recovery in business. The aftereffects of the pandemic in the form of inflation, higher energy and gas prices, continued shortages in goods, and labor issues continue to create challenges. Cutting tool manufacturers must navigate these barriers in order to remain profitable and meet customer demands. The reshoring trend in manufacturing continues to accelerate based on the supply chain issues. Finding employees is one of the key problems for our business to keep up with manufacturing to meet the needs of our customers. We all have been searching for creative methods to attract employees and then retain them.

This September, the International Manufacturing Technology Show (IMTS) will resume in Chicago. It should be interesting to see the new manufacturing equipment and technology introduced since the last show. USCTI and AMT will be hosting a breakfast and roundtable discussion on Thursday, September 15th. The roundtable topics will be centered on some of the key industry issues.

USCTI has resumed our biannual conferences and much of the meeting discussions have centered around the industry challenges. Along with this, the institute continues to try and enhance our value to the membership. Focus areas are in targeting new members due to the continuing trend in expanding membership, creating technical content for the industry, developing new programming like the HSS Course and Crucible Plant Tour, enhancing our scholarship program, and adding to the statistics information USCTI provides its members.

Hopefully IMTS will be well attended and successful, look forward to seeing you there.

Here's to wishing everyone an enjoyable summer!

Jeff Major
Greenfield Industries
USCTI President

ABOUT USCTI

The United States Cutting Tool Institute (USCTI), formed in 1988, works to represent, promote, and expand the U.S. cutting tool industry and to promote the benefits of buying American-made cutting tools manufactured by its members. These promotions, in conjunction with your company's individual promotional efforts, serve to strengthen your business and the industry as a whole.

USCTI membership is structured and formed into a number of product-related divisions, each having its own technical focus/committee. Each division is open for member representation in accordance with the specific cutting tool products manufactured by their company. Currently, product divisions include the following:

Carbide Tooling	Substrate Materials	PCD & PCBN
Drill & Reamer	Surface Coating	All Other Tooling
Metal Cutting Saw Blades	Tap & Die	
Milling Cutter	Tool Holder	

Members also have opportunities to become involved in institute affairs through a network of general interest committees, such as Programs and Statistics. Division technical committees focus on specific product-related technical issues, such as the development and maintenance of product standards (national and international), and may involve designations of standard and special products; material specifications; testing; types, forms and sizes; geometry and terminology; specification development and maintenance; product information and training materials, etc.

USCTI offers an annual scholarship of \$5,000 for an individual at a member company or an individual recommended by a member company. This is a great way to promote careers in manufacturing and also to attract and retain employees.

If you are interested in membership, please contact the USCTI offices at 216-241-7333 or uscti@uscti.com.
